

Construction, Maintenance, Controls & Instrumentation Solutions

By offering seamless high/low voltage, construction and maintenance solutions, the need to coordinate multiple vendors is eliminated, enabling efficient project delivery and improved cost control. The result is maximum value for every electrical construction dollar.

Contra Costa Electric combines broad commercial electrical services industry expertise with a strong commitment to quality service. We have been providing electrical services since 1946.

Quality Industrial Expertise

Contra Costa Electric offers expert industrial process control and instrumentation services. We provide the electrical distribution, motor control, variable speed drive, and supervisory control and data acquisition (SCADA) systems that drive industrial applications. Our certified technicians and staff can install, calibrate, test, start up and maintain these leading-edge systems to enable exceptional responsiveness, efficiency and cost control.

We also install high and low-voltage switchgear cables and cable trays. These systems comply with regulatory standards, while delivering maximum productivity and profitability.

Contra Costa Electric also holds the prestigious ISO 9001:2000 certification, an international quality standard that emphasizes client focus and a preventive approach to building operations management. It's your assurance of consistent, measurable and repeatable quality on every electrical systems project.

Markets

- » Oilfield (upstream oil & gas)
- » Refinery & pipeline (midstream oil & gas)
- » Manufacturing
- » Food processing & Produce Packing
- » Mining
- » Water treatment & conveyance

Services

- » Above ground conduit installation
- » Underground conduit installation
- » Cable tray and cabling installation
- » Explosion-proof conduit systems and enclosures
- » Low and medium voltage wire installation
- » Low and medium voltage wiring terminations
- » Wire pulling
- » Metal-clad switchgear installation & replacement
- » Outdoor-rated switchgear installation & replacement
- » Transformers of various voltages and types
- » UPS backup systems
- » Communications cabling and terminations
- » Fiber Optic cabling & terminations
- » Heat trace cabling, heaters and associated components
- » Instrumentation
 - Installation
 - Calibration
 - Troubleshooting & Repair

Infinite Solutions.
